AIM OF THE CONFERENCE

The main aim of the Conference is to create a platform for researchers, teaching staff, PhD students, administration employees and practicing engineers to present their latest achievements and the exchange of knowledge in the description of hydrological processes and their impact on water and wastewater management.

CONFERENCE TOPICS

-  Legal aspects related to the preparation of hydrological documentation
-  Quality of hydrological data in water resources management
-  Water resources for the development of inland shipping
-  The role of sociohydrology in sustainable management of water resources
-  Methodology for determining the amount of water resources in controlled and uncontrolled catchments
-  Problems of determining surface water protection zones
-  Impact of climate change on water resources
-  The role of ecohydrology in shaping water resources
-  Impact of anthropogenic pressure on the quality of water and possibilities of its use by humans

CONFERENCE VENUE

The conference will be held in a hybrid form at the University of Agriculture in Krakow
Balicka Str. 253 c

Online participation will be implemented through the MS Teams platform.

PAPER SUBMISSIONS

The application form with the paper title and a short summary (also for participants who signed up during last year's registration) should be sent by the online registration form. Detailed information about the conference is available on the website of the Association of Polish Hydrologists (www.shp.org.pl/konferencje). New papers, that will be submitted to the conference and will be positively assessed in the course of the editorial process of individual journals, will be published in: Water (IF = 2.554), Atmosphere (IF = 2.397) and Acta Scientiarum Polonorum Formatio Circumiectus (journal is indexed in Web of Science Core Collection).

DATES

Sending full texts of articles:
